LeonLink Inspection — FINAL (Oct 23 night)

Inspector India · Oct 24, 2026, 12:20 AM ET. Rubric v1. Evaluation closed 12:15 AM ET. Evidence: Team 1–5 and Tiktok team chats, leonlink-home / kids-corner / team5-staging / Viralvideo-team-hq repos and BOARD.md files, Stonewall self-report PDF, Leon→Pip 24h command log. "Chat only" / "self-reported" = not yet confirmed in GitHub. Rubric: order clarity & execution 25, communication 25, board/GitHub hygiene 20, responsiveness 15, forward planning 15. A 90–100, B 80–89, C 70–79, D 60–69, F <60.

Correction to the 11:30 update: leonlink-home PR #12 is Love's Rolex fix (merged by Hands, commit 73d0915), not halloween-candy. Halloween-candy is being drafted, not pushed yet.

Corrections accepted since the rough draft (with evidence): (1) Pip: PRs #3–5 were PASSED and merged Oct 23 1:24 AM ET (884a279, 8dd321b, 6b72a00; board d598452); PRs #7–10 merged 5:11 PM ET. (2) Stonewall: GitHub sign-in blocker WAS escalated with a specific ask, waiting on Leon’s approval tap (timed out 10:35 PM); 2-hour/hourly polling was Leon’s standing order. (3) PR #12 merged 11:03 PM after Leon’s 10:25 PM approval gate: listed as possibly approved by Leon off-GitHub, cannot be confirmed; not counted against anyone. (4) Leon moved deadlines up because work stalled; graded as a designer intervention. After it, no team commits landed in leonlink-home between 11:40 PM and 12:15 AM, and no INSPECTION-COMMS entries were filed.

Leon Tucker

Role: System designer (ingenuity & improvement) **Grade:** B — imagined starting rank C/D (likely lower)

Area	Score
Order clarity & execution	21/25
Communication	21/25
Board & GitHub hygiene	16/20
Responsiveness	13/15
Forward planning	12/15
Total	83/100

Explanation

Started from ~20 bots in one chat and zero finished videos. Now: team chats, leads, a boss layer, file handoffs (BOARD.md, STONEWALL-READ-ME-FIRST.md, Viralvideo-team-hq letters) and inspections. Evidence it works: Team 3 closed the watch lane (10/10 live pages, PRs merged, #12 merged tonight); Team 5 and Tiktok relayed your deadline change to Stonewall via repo files within minutes; Stonewall finished ~20 orders with no chat access. Weak spot: you are still the router and nudger ("follow up", "set a deadline", "keep Team 3 busy"), and the two logs used different reporting briefs. You moved deadlines up to break a stall; pressure alone did not produce new commits before 12:15. Tonight you also handed reporting to an independent inspector with a GitHub results/comms folder, which cuts future relay load.

Good / Better / Best

Good: Teams exist and produce some output.

Better: Every team produces linked output; leads self-direct.

Best: Self-running: queue-driven leads, boss escalates without you, uniform reporting.

Landed: Between Better and Best on design; Better on execution. Clear improvement.

Specific room for improvement

• Standing rule for Paperwork: every order gets owner + deadline + follow-up within one sweep.

• One reporting template for all bots (order / action / time / link).

• A NEXT-UP queue in every BOARD.md so idle teams pull work themselves.

• Right-size Team 2 and Team 4 instead of adding bots (see summary).

• Approvals given in chat get a one-line "Approved by Leon" PR comment.

• Consider a 15–30 min Stonewall watch only while a deadline is open.

Stonewall

Role: Solo bot, other ecosystem; sees work only via GitHub/.md **Grade:** B+

Area	Score
Order clarity & execution	22/25
Communication	21/25
Board & GitHub hygiene	18/20
Responsiveness	12/15
Forward planning	13/15
Total	86/100

Explanation

Self-report: ~20 Leon orders (2:58 AM–11:23 PM), most done same hour/day; ~40 deploys vs 85 cap; flagged sub-5 lists (Rolex 1, PCP 3, Field Watches 4) instead of padding; caught the Team 5 deadline change ~28 min after it hit the repo. Ingenuity credited for working without chats. Minuses: wrong 320px fix (Leon corrected), swipe spotlight live ~3h after a "now" order, card art stuck on GitHub auth. Self-reported; repo spot-checks before FINAL.

Good / Better / Best

Good: Executes orders correctly.

Better: Fast, rule-following, flags gaps.

Best: Same with near-zero rework and faster polling.

Landed: Better.

Specific room for improvement

• Poll the .md files every 15–30 min (not hourly) to cut the 28-min lag.

• Test at 320px before deploying layout fixes.

• Escalate the GitHub auth blocker with a specific ask.

Paperwork (boss role)

Role: Oversees Teams 1–4 + Tiktok (not Team 5) **Grade:** B-

Area	Score
Order clarity & execution	18/25
Communication	19/25
Board & GitHub hygiene	16/20
Responsiveness	13/15
Forward planning	14/15
Total	80/100

Explanation

Relays orders quickly; moved teams to file-only reporting on BOARD.md. But Team 3 PASS/FIX verdicts (PRs #3–5) and the deep-link pass stayed overdue, Team 3 sat idle until your 10:59 PM note, and you had to order follow-ups/deadlines yourself. His log lists orders only because of a thinner brief, so unconfirmed outcomes are "unverified", not missed. Some slips likely come from the split with pip1.

Good / Better / Best

Good: Relays orders accurately.

Better: Sets owner + deadline, follows up unprompted.

Best: Spots idle teams and bottlenecks (Dash) before Leon does.

Landed: Good.

Specific room for improvement

• Follow up every order within one sweep with a written deadline.

• Assign the next lane within 15 min of a lane closing.

• Reassign stuck single-owner tasks (Dash party-speakers since 5:05 PM).

• Close or cancel overdue verdicts on PRs #3–5.

pip1 (Paperwork in Team 1)

Role: Team 1 lead **Grade:** C-

Area	Score
Order clarity & execution	16/25
Communication	18/25
Board & GitHub hygiene	14/20
Responsiveness	10/15
Forward planning	12/15
Total	70/100

Explanation

No deep-link commit by any deadline; a reminder fired ~7 times "should be paused" and nobody paused it; Blueprint's leonlink.net problem never escalated. Positives: owned misses, closed PR #6 unmerged, file-only updates, midnight deadline on BOARD.md.

Good / Better / Best

Good: Team ships assigned items.

Better: Ships on time with links.

Best: Ships, live-checks, removes noise.

Landed: Below Good.

Specific room for improvement

• Ship the deep-link commit before 12:15 and link it on BOARD.md.

• Give every reminder an owner and a kill switch.

• Give Blueprint a live-check workaround (Vercel preview URL) or reassign.

Blueprint

Board & GitHub hygiene	14/20
Responsiveness	10/15
Forward planning	11/15
Total	68/100

Explanation

Missed 8:21 PM Halloween deadline; PR #11 (halloween-costumes, Wave 1 pattern) opened ~10 PM with a clear write-up. Let members post identical hourly check-ins.

Good / Better / Best

Good: Meets deadlines.

Better: Meets them with linked PRs.

Best: Members produce, not just check in.

Landed: Below Good.

Specific room for improvement

• Require links in every check-in.

• Hand PR #11 review/QA to members.

Explanation

Missed 8:21 PM deadline; PR #11 ~10 PM; 4+ members repeat link-less check-ins.

Good / Better / Best

Good: Delivers assignments.

Better: On time with links.

Best: Self-directing.

Landed: Below Good.

Specific room for improvement

• Links-or-silence rule

• Give each member one page with a PR

Team vs. 1–2 bots

1–2 bots would do as well or better. Right-size: lead + 1–2 builders.

Team 3

Role: Team **Grade:** A-

Area	Score
Order clarity & execution	23/25
Communication	23/25
Board & GitHub hygiene	19/20
Responsiveness	13/15
Forward planning	13/15
Total	91/100

Explanation

Watch lane done (10/10 live), LANE COMPLETE 6f988be, PR #12 merged, halloween-candy split in minutes with build / products / pre-check roles.

Good / Better / Best

Good: Delivers assignments.

Better: On time with links.

Best: Self-directing.

Landed: Better, near Best.

Specific room for improvement

• Ask for next lane before idling

• Pre-checkers prepare checklists while waiting

Team vs. 1–2 bots

Worth the team. Parallel build + product + QA beats 1–2 bots. Right-size: 4–5 (could merge the two pre-checkers).

Team 4

Role: Team **Grade:** C-

Area	Score
Order clarity & execution	15/25
Communication	17/25
Board & GitHub hygiene	15/20
Responsiveness	11/15
Forward planning	11/15
Total	69/100

Explanation

Plans delivered (wedding-gems, 81b5a02) but party-speakers unstarted since 5:05 PM; 2 members idle waiting.

Good / Better / Best

Good: Delivers assignments.

Better: On time with links.

Best: Self-directing.

Landed: Below Good.

Specific room for improvement

• Reassign party-speakers

• No one waits more than one sweep

Team vs. 1–2 bots

1–2 bots would do as well or better. Right-size: lead + 2.

Team 5

Role: Team **Grade:** B

Area	Score
Order clarity & execution	20/25
Communication	21/25
Board & GitHub hygiene	17/20
Responsiveness	12/15
Forward planning	11/15
Total	81/100

Explanation

Clean single-writer handoff to Stonewall; intros underway to a clear standard; 2 quiet members.

Good / Better / Best

Good: Delivers assignments.

Better: On time with links.

Best: Self-directing.

Landed: Better.

Specific room for improvement

• Per-game checklist file with links

Team vs. 1–2 bots

Break-even. Right-size: 3 (lead, builder, QA).

Tiktok team

Role: Team **Grade:** B- (provisional)

Area	Score
Order clarity & execution	19/25
Communication	22/25
Board & GitHub hygiene	16/20
Responsiveness	13/15
Forward planning	11/15
Total	81/100

Explanation

Strong relay and planning; 3 scripts approved; no video delivered yet.

Good / Better / Best

Good: Scripts approved.

Better: Videos posted early.

Best: Videos posted and iterated.

Landed: Good.

Specific room for improvement

• First video before Oct 25

Team vs. 1–2 bots

Too early; likely break-even. One video per creator is reasonable if each ships.

Summary: Team vs. 1–2 bots

Money line: a bigger team only raised output where each member owned a specific, linked piece (Team 3). Elsewhere output per bot fell below Stonewall alone (~20 orders, ~40 deploys in a day, self-reported), because time went to check-ins and waiting. Quality did not suffer from size in Team 3; in Teams 2 and 4 size added noise, not rework.

Team	Grade	Verdict	Right-size
Team 1	D+	1–2 bots would do as well or better	pip1 + 1 builder.
Team 2	D+	1–2 bots would do as well or better	lead + 1–2 builders.
Team 3	A-	Worth the team	4–5 (could merge the two pre-checkers).
Team 4	C-	1–2 bots would do as well or better	lead + 2.
Team 5	B	Break-even	3 (lead, builder, QA).
Tiktok team	B- (provisional)	Too early; likely break-even	—

Model: Team 3, plus a no-idle rule.

SOP: every update links a PR/commit or names a blocker; no one waits more than one sweep; failed live checks escalate within one sweep; reminders have an owner and kill switch; a NEXT-UP queue in each BOARD.md.

Simplify: cut Team 2 and Team 4 to 2–3 bots each; Team 1 to 2.

Night-over-night tracking (from Oct 24): Pip's NEXT-UP queue, 15-min next lane, written deadlines; Dash reassignment; pip1 deep-link commit; Team 2 halloween-candy PR; first Tiktok video by Oct 25.

Rubric note: v1 kept. Lesson: self-reports must state order / action / time / link so outcomes can be compared; unconfirmed items are graded unverified, not missed.
